ABOUT YOUR APPOINTMENT

Harley Street Smiles offers a straightforward 3-step plan to help you optimize and sustain the results of your initial purchase with us. By purchasing from us, you acknowledge that you are buying a self-administered teeth whitening product.

- We cannot offer advice on smoking.
- We cannot offer dietary advice.

We are unable to provide advice, recommendations, or diagnoses, including post-care advice on your diet or smoking habits. If you need clarification or have any uncertainties, please consult your dentist or doctor.

The practise of dentistry requires registration on the Dental Register persuant to the Dentists Act 1984. However, self-administered systems do not require dental registration and have provided safe and successful results for years without the need of a dentist. Harley Street Smiles is not offering a dental treatment, dental service or anything that might constitute the practise of dentistry. In particular, no discussion about the risks and benefits of the system will take place with you.

Clear guidance as to self-administration is provided within the product. No advice, guidance or any other assistance with regards to the use of the system can be provided by Harley Street Smiles or any certified specialist. The system allows you the customer to control the effectiveness of the product by providing you with simple step-by-step self-administered instructions. Results from using self-administered teeth whitening products can vary from person to person. You might need additional applications to enhance and maintain results, but we cannot specify the timing for this.

While the product is appropriate for use with veneers, crowns, or fillings, we cannot assure that these will return to their original color. For any concerns or questions, please consult your dentist.
